 West Delhi, Delhi, India  +91 8700166507

SKILLS

Programming Languages:	JavaScript, Java
Frameworks and Libraries:	React.js, Express, Next.js, Mongoose
Database:	MongoDB, MySQL
Cloud Providers:	Cloudinary, Vercel, Render, Netlify
Version Control:	Git, Github
Others:	Node.js, Docker, Nginx, HTML, CSS, Postman,

WORK EXPERIENCE

Aero2Astro-Tech Jan 2024 – Jul 2024

Full Stack Developer Intern

- Built and tested responsive UI components and REST APIs using the MERN stack for internal web applications.

Aero2Astro-Tech Jul 2024 – Present

Full Stack Developer

Building a **Drone Data Management** and **Pilot Registration & Management System** on the MERN stack.

- Architected a pilot registration system onboarding **1500+ pilots** with end-to-end verification.
- Integrated **Mapbox**, **CesiumJS**, and **GeoServer** for 2D/3D geospatial visualization of GeoTIFF and LAS/LAZ point cloud data.
- Implemented **LAS/LAZ point cloud** and 3D model visualization, enabling in-browser review of large aerial datasets without third-party tools.
- Reduced storage overhead by **10x** via compressed formats and chunked Cloudinary uploads with on-demand video streaming.
- Deployed backend on **Azure VM** with **AWS S3**, containerizing **4+ services** via Docker.
- Automated deployments with **GitHub Actions CI/CD**, using **Nginx** and **Certbot** to enforce HTTPS via SSL/TLS certificates.

PROJECTS

AI Interview Agent [\[Live link\]](#) **Github Repository:** <https://github.com/tusharawat01/AIInterviewAgent>

Web Application

Developed a full-stack AI mock interview platform using React, Node.js, Express, and MongoDB with Google OAuth via Firebase.

- Integrated OpenRouter (GPT-4o-mini) to dynamically generate role-specific interview questions from resume data and evaluate spoken answers on confidence, communication, and correctness.
- Developed an ATS Resume Score Checker that parses uploaded PDFs, compares against job descriptions using AI, and returns keyword match analysis, section scores (0–10), and improvement suggestions
- Implemented PDF resume parsing on the server (pdf-parse) to auto-extract candidate skills, projects, and experience.
- Built end-to-end voice interaction using the Web Speech API — AI reads questions aloud and transcribes spoken answers in real time.
- Designed a credit-based subscription system with Razorpay (Free / Starter / Pro plans) including order creation and signature verification.
- Generated interactive score reports with Recharts and exportable PDF summaries via jsPDF.

VideoTube (Backend) **Github Repository:** <https://github.com/tusharawat01/Backend.git>

Video Streaming Platform

Designed a video streaming platform similar to YouTube and added tweet-like feature to enhance user engagement.

- Crafted the application using JavaScript, Express, MongoDB, Cloudinary, Node.js, and Postman, harnessing 100% of these technologies to build a robust solution
- Employed dependencies such as bcrypt, cookie-parser, cors, dotenv, jsonwebtoken, mongoose, mongoose-aggregate-paginate-v2, multer to improve functionality by 95%.

EDUCATION

Guru Gobind Singh Indraprastha University
Bachelor of Technology(MAE)

West Delhi, Delhi, India
Graduation Date: Jul 2022

NavJeevan Academy Sr. Sec. School
Secondary and Senior Secondary

West Delhi, Delhi, India
Completion Date: Mar 2017
